Audit Logs	/admin/audit-logs
Team Management	/admin/team
Store Waivers	/admin/store-waivers
Peptide Cheat Sheet	/peptide-cheat-sheet
Client Dashboard	/dashboard
Omega Store	/store

Phase 10: Payment & Revenue Features

1. Venmo Payment Fix

What was fixed: Venmo payment redirects were returning 404 errors after successful payment.

How to test:

1. Go to a client protocol with pending payment
 2. Select Venmo as payment method
 3. Complete the Venmo payment flow
 4. Verify you're redirected to `/payment/success` (not a 404 page)
 5. Check that `/payment/failure` and `/payment/venmo-confirmation` pages also load correctly
-

2. Admin Override for Manual Payments

Location: Admin → Client Edit → Pricing Tab

Features to test:

- ☐ “Mark as Paid” button appears for pending payments
- ☐ “Mark as Failed” button appears for pending payments
- ☐ “Mark as Refunded” button appears for paid payments
- ☐ Payment status badge updates immediately after action
- ☐ Inventory is deducted when marking as paid
- ☐ Packing slip is generated when marking as paid

How to test:

1. Navigate to Admin → Clients → Select a client with pending payment
2. Go to the Pricing tab
3. Look for the Payment Status section
4. Click “Mark as Paid” and verify:

- Status changes to “Paid”
 - Email notification is sent to client
 - Inventory is deducted (check Inventory page)
 - Packing slip is created (check Packing Slips page)
-

3. Payment Email Notifications

Automatic emails sent when:

- Payment is marked as received (success email)
- Payment fails (failure email with retry instructions)
- Payment is refunded (refund confirmation email)

How to test:

1. Mark a payment as paid → Check client receives success email
 2. Mark a payment as failed → Check client receives failure email
 3. Mark a payment as refunded → Check client receives refund email
 4. Verify emails include order details and next steps
-

4. Payment History Dashboard

Location: Admin → Payment History (/admin/payment-history)

Features to test:

- ☐ View all payment transactions in table format
- ☐ Filter by status: Pending, Paid, Failed, Refunded
- ☐ Filter by date range (start date, end date)
- ☐ Filter by payment method: Venmo, CC, PayPal, Stripe, Other
- ☐ Search by client name or email
- ☐ View payment totals and statistics cards
- ☐ Monthly trends chart displays correctly

- ☐ Payment method breakdown pie chart
 - ☐ Conversion rate tracking
 - ☐ Pending follow-up alerts for overdue payments
-

5. Payment Reminder Emails

Automatic reminders sent at:

- 3 days after protocol sent (gentle reminder)
- 7 days after protocol sent (moderate reminder)
- 14 days after protocol sent (urgent reminder)

How to test:

1. Create a test client with pending payment
 2. Wait for cron job to run (daily at 9 AM) or manually trigger
 3. Verify reminder emails are sent at correct intervals
 4. Verify reminder count is tracked (no duplicate emails)
 5. Verify payment link is included in emails
-

6. Revenue Dashboard

Location: Admin → Payment History (`/admin/payment-history`)

Features to test:

- ☐ Total Revenue card shows correct amount
- ☐ Current Month Revenue card
- ☐ Previous Month Revenue card
- ☐ Weekly Revenue card
- ☐ Average Order Value calculation
- ☐ Amount column in payment history table
- ☐ Revenue breakdown by payment method

- ☐ Pending revenue shown in follow-up alerts
-

7. Revenue Goals/Targets

Location: Admin → Revenue Goals (</admin/revenue-goals>)

Features to test:

- ☐ View current month progress bar
- ☐ Set monthly revenue targets for next 12 months
- ☐ Edit existing goals
- ☐ Delete goals
- ☐ Visual indicators: On Track (green), Behind (yellow), Exceeded (blue)
- ☐ Percentage of goal achieved displays correctly

How to test:

1. Navigate to Revenue Goals page
 2. Click “Set Goal” for a future month
 3. Enter target amount (e.g., \$10,000)
 4. Save and verify goal appears in the list
 5. Check progress bar updates based on actual revenue
-

8. Admin Notification Settings

Location: Admin → Notification Settings (</admin/notification-settings>)

Features to test:

- ☐ Enable/disable payment reminders globally
- ☐ Customize reminder schedule (change days: 3, 7, 14)
- ☐ Set maximum number of reminders
- ☐ Configure send time
- ☐ Preview shows how reminders will be sent

- ☐ Per-client notification preferences

How to test:

1. Navigate to Notification Settings
 2. Toggle “Enable Payment Reminders” off
 3. Verify no reminder emails are sent
 4. Toggle back on and customize schedule
 5. Verify new schedule is applied
-

9. Revenue Goal Alerts

Automatic email alerts:

- When monthly revenue goal is achieved (celebration email)
- When revenue is at risk (below 50% with less than 10 days remaining)

How to test:

1. Set a revenue goal for current month
 2. Mark enough payments as paid to exceed goal
 3. Verify admin receives “Goal Achieved” email
 4. For “at risk” test: Set high goal, wait until mid-month with low revenue
-

10. Historical Goal Tracking

Location: Admin → Revenue Goals → Historical Tab

Features to test:

- ☐ View past 12 months performance
- ☐ Goal vs actual revenue for each month
- ☐ Trend analysis: Improving, Declining, Stable
- ☐ Bar chart visualization
- ☐ Summary cards: Total Revenue, Goals Achieved, Avg Monthly, Trend

- ☐ Status badges: Achieved, On Track, At Risk, Behind
 - ☐ Toggle between Upcoming and Historical tabs
-

11. Client Payment Portal

Location: `/payments/:token` (client-facing)

Features to test:

- ☐ Client can view all their protocols
- ☐ Payment status displayed for each protocol
- ☐ Outstanding balances shown clearly
- ☐ Payment history with dates and amounts
- ☐ Payment method icons (PayPal, Venmo, CC)
- ☐ Status badges (Pending, Paid, Failed, Refunded)
- ☐ “Pay Now” links for outstanding balances
- ☐ Payment details dialog with item breakdown
- ☐ Summary cards: Total Paid, Outstanding, Total Protocols

How to test:

1. Get a client’s access token from their protocol URL
 2. Navigate to `/payments/{token}`
 3. Verify all payment information displays correctly
 4. Click on a payment to see item breakdown
-

12. Automated Goal Suggestions

Location: Admin → Revenue Goals → “AI Suggestions” button

Features to test:

- ☐ Click “AI Suggestions” to analyze historical data
- ☐ View suggested goals for upcoming months

- ☐ Confidence levels: High, Medium, Low
- ☐ Growth trend calculation
- ☐ “Apply Suggestion” button for individual months
- ☐ “Apply All Suggestions” button for bulk application
- ☐ Data quality warning when limited data available
- ☐ Statistics summary: Total Revenue, Average, Trend

How to test:

1. Navigate to Revenue Goals page
 2. Click “AI Suggestions” button
 3. Review suggested amounts and confidence levels
 4. Click “Apply” on a suggestion to auto-fill goal
 5. Click “Apply All” to fill all suggested goals
-

Phase 8: HIPAA Compliance & Security

13. Audit Logging

Location: Admin → Audit Logs (`/admin/audit-logs`)

Features to test:

- ☐ View all audit log entries
 - ☐ Filter by action type (role_change, user_created, etc.)
 - ☐ View admin name, target user, action details
 - ☐ PHI access logging
 - ☐ 6-year retention policy
-

14. Field-Level Encryption

Backend feature - verify in database:

- ☐ Sensitive PHI fields are encrypted (AES-256-GCM)
 - ☐ Encryption keys are properly managed
 - ☐ Data can be decrypted when accessed by authorized users
-

15. Security Headers

Verify in browser developer tools (Network tab):

- ☐ Helmet middleware active
 - ☐ Content Security Policy (CSP) headers present
 - ☐ X-Frame-Options header
 - ☐ X-Content-Type-Options header
-

Phase 7: Testing & CI/CD

16. Role-Based Access Control

Location: Admin → Team Management (`/admin/team`)

Roles to test:

- **Admin:** Full access to everything
- **Manager:** Cannot modify admin accounts/settings
- **Viewer:** Read-only access to protocols, analytics, clients
- **Finance:** Manage payments, refunds, financial operations

How to test:

1. Create users with different roles
 2. Log in as each role
 3. Verify menu items are hidden/shown appropriately
 4. Verify actions are restricted based on role
-

Phase 6: E2E Testing & Refactoring

17. Store Waivers Management

Location: Admin → Store Waivers (`/admin/store-waivers`)

Features to test:

- ☐ View all signed waivers
 - ☐ Filter by status: Active, Expiring Soon, Expired
 - ☐ Bulk extend expiration (3/6/12/24 months)
 - ☐ Bulk revoke waivers
 - ☐ Send announcement emails to waiver holders
 - ☐ View waiver renewal history
 - ☐ Scheduled announcements
 - ☐ Announcement templates
-

Phase 5: Component Library

18. Shared UI Components

Verify these components work throughout the app:

- ☐ TableSkeleton (loading states)
- ☐ EmptyState (no data scenarios)
- ☐ ProgressBar and StepProgress
- ☐ StatusBadge (consistent status display)
- ☐ LoadingSpinner (FullPageLoader, InlineLoader, ButtonLoader)
- ☐ InfoTooltip and LabelWithTooltip
- ☐ CopyButton and CopyField
- ☐ ConfirmDialog and DeleteConfirmDialog
- ☐ Breadcrumb navigation

Phase 4: Admin Efficiency

19. Keyboard Shortcuts

Test these shortcuts:

- ☐ `Cmd+K` (or `Ctrl+K`): Global search
 - ☐ `Cmd+N` : New client
 - ☐ `Cmd+Shift+N` : New template
 - ☐ `Cmd+/?` : Help dialog
-

20. Quick Actions Button

Location: Floating button on admin dashboard

Features to test:

- ☐ Quick Actions button visible on dashboard
 - ☐ Opens menu with common actions
 - ☐ Fast navigation to frequently used features
-

21. Today's Tasks Widget

Location: Admin Dashboard

Features to test:

- ☐ Shows pending actions for today
 - ☐ Overdue follow-ups highlighted
 - ☐ Click to navigate to relevant page
-

Earlier Features (Phases 1-3)

22. Peptide Cheat Sheet

Location: `/peptide-cheat-sheet` and Admin → Peptides

Features to test:

- ☐ View all peptides by category
 - ☐ Search and filter peptides
 - ☐ Admin: Add/edit/delete peptides
 - ☐ Admin: Upload images/PDFs for peptides
 - ☐ User: Favorite peptides
 - ☐ User: View favorites in profile
-

23. Client Dashboard

Location: `/dashboard` (client-facing)

Features to test:

- ☐ Welcome message with time-based greeting
 - ☐ Quick stats showing protocol overview
 - ☐ Quick links to protocol, store, messages
 - ☐ Recent activity section
 - ☐ My Progress tracker
-

24. Booking Calendar System

Location: Admin → Booking Calendar

Features to test:

- ☐ View calendar with appointments
- ☐ Set availability hours per day

- ☐ Block vacation/time off
 - ☐ Client booking page
 - ☐ Available slot picker
 - ☐ 24-hour reminder emails
 - ☐ 1-hour reminder emails
-

25. Coupon Code System

Location: Admin → Coupons

Features to test:

- ☐ Create coupons with discount percentage
 - ☐ Set usage type: One-time, Multi-use, Unlimited
 - ☐ Set expiration dates
 - ☐ Bulk coupon generation
 - ☐ Coupon analytics dashboard
 - ☐ Auto-deactivation when max uses reached
 - ☐ Expiration reminders
-

26. Client Projects (Back-Office)

Location: Admin → Client Projects

Features to test:

- ☐ View all client projects
- ☐ Filter by lifecycle stage
- ☐ Task and subtask management
- ☐ Assign tasks to team members
- ☐ File attachments (S3 storage)
- ☐ Packing slips embedded in project view
- ☐ Drag-and-drop task reordering

27. Email Tracking

Features to test:

- ☐ Email sent status on client list
 - ☐ Email opened status on client list
 - ☐ Click-through tracking
 - ☐ Email analytics widget on dashboard
-

28. Clone Protocol Feature

Location: Admin → Client Edit → Clone button

Features to test:

- ☐ Clone to new client
 - ☐ Clone to existing client
 - ☐ Bulk clone to multiple clients
 - ☐ Clone history tracking
 - ☐ “New from Template” quick action
-

29. Template Management

Location: Admin → Templates

Features to test:

- ☐ Create/edit templates
- ☐ Drag-and-drop item reordering
- ☐ Copy items from another template
- ☐ Template preview mode
- ☐ Template categories/tags
- ☐ Sync with Protocol Items

- ☐ Out-of-sync indicator
-

30. Inventory Management

Location: Admin → Inventory

Features to test:

- ☐ View all inventory items
 - ☐ Edit item details (name, price, SKU)
 - ☐ Adjust quantities
 - ☐ Low stock alerts
 - ☐ Category management
 - ☐ Protocol-to-inventory mapping
 - ☐ Duplicate scanner
-

Test Account Information

Admin Test Account:

- Email: [Your admin email]
- Password: [Your admin password]

Client Test Account:

- Email: [Test client email]
- Password: [Test client password]

Test Payment Cards:

- PayPal Sandbox: Use PayPal sandbox credentials
 - Stripe Test: 4242 4242 4242 4242 (any future date, any CVC)
-

Reporting Issues

When reporting issues, please include:

1. **Feature name** from this list
 2. **Steps to reproduce** the issue
 3. **Expected behavior** vs **Actual behavior**
 4. **Screenshots** if applicable
 5. **Browser and device** information
-

Questions?

Contact the development team for any questions about testing these features.
